

THE 7 COSTLY PROPERTY PITFALLS

**What Every Homeowner Should
Check Before Their Next Move**

The 15-Month Wait Has Changed.
Should You Sell Now?

**POSITION • POLICY • PROPERTY • POTENTIAL
PEOPLE • PLAN • PROTECTION**

Avoid expensive mistakes.
Make confident, well-planned moves.

THE ASK DEBS 7P FRAMEWORK

Before you make your next property move, check the seven things that can change the outcome.

1	POSITION What should I do first?
2	POLICY When rules change, markets react.
3	PROPERTY Is this a safe or risky move?
4	POTENTIAL What's coming next?
5	PEOPLE Who will buy from me next?
6	PLAN What's my exit strategy?
7	PROTECTION The most crucial P.

1. POSITION

What Should I Do First?

Should you **sell first or buy first**? The wrong sequence can leave you without a home or create unnecessary costs.

REAL CLIENT CASE

A client's home was sold before their next home was secured. They had to find interim accommodation — **moving twice, paying extra rental and dealing with months of unnecessary stress.**

ASK YOURSELF

1. Should I sell or buy first?
2. What happens if my timelines don't match?

THE RISK

A successful sale without a properly planned next move can create another problem.

2. POLICY

When Rules Change, Markets React

The **15-month wait-out rule has changed**, opening new options for some homeowners — but does that mean HDB or private property is the better move now?

ASK YOURSELF

1. How has the policy change affected prices where I want to buy?
2. Am I better positioned buying HDB or private property?

THE RISK

Don't make a major property decision based on a policy headline alone.

3. PROPERTY

Safe or Risky?

A property may look affordable until we calculate the **real numbers behind the move**.

REAL CLIENT CASE

After doing the full calculations for a client's intended purchase, we realised it would leave them with **too little financial buffer**. We walked away.

ASK YOURSELF

1. Is this a safe or risky move after the numbers are done?
2. How much will I have left after buying?

THE RISK

Finding out you're overstretched after committing is too late.

4. POTENTIAL

What's Coming Next?

Don't just look at the property today. Look at **what's coming around it tomorrow.**

ASK YOURSELF

1. How much future supply is coming into this area?
2. What transformation or infrastructure is planned nearby?

THE RISK

Future supply and transformation can change the attractiveness of what you're buying today.

5. PEOPLE

Who Will Buy From Me Next?

You may love the property. But eventually, **someone else needs to want it too.**

REAL CLIENT CASE

A client bought a relatively affordable **freehold property at Flora Drive**. When it was time to exit, the location and limited amenities narrowed the buyer pool — and it took **more than three months to sell**.

ASK YOURSELF

1. Who is likely to buy this property from me next?
2. How easy will it be to exit when I need to?

THE RISK

Cheap to enter doesn't always mean easy to exit.

6. PLAN

What's My Exit Strategy?

Don't only plan how to **enter** a property. Know how you intend to eventually **exit** it.

ASK YOURSELF

1. How long should I realistically hold?
2. What would trigger my next move?

THE RISK

Without an exit strategy, you could be holding the wrong property at the wrong time.

7. PROTECTION

The Most Crucial P

Ultimately, your next move should protect what you've spent years building — **your cash, CPF and financial freedom.**

ASK YOURSELF

1. If circumstances change, can I still comfortably hold?
2. Am I growing my position or risking what I've already built?

THE RISK

You can recover from missing an opportunity. A poorly planned property move can take years to recover from.

BEFORE YOUR NEXT PROPERTY MOVE...

Don't just ask:

“Should I sell now?”

Ask if you've checked your:

**POSITION → POLICY → PROPERTY → POTENTIAL
PEOPLE → PLAN → PROTECTION**

Before you make the move, let's run through your 7Ps.
